

# MARKETING CAMPAIGN PERFORMANCE ANALYTICS DASHBOARD

## Project Documentation

|              |                                 |
|--------------|---------------------------------|
| Project Type | Business Intelligence Dashboard |
| Domain       | Digital Marketing Analytics     |
| Tool         | Microsoft Power BI              |
| Technologies | Power Query, DAX, Excel         |

## 1. Project Overview

This project presents an interactive Business Intelligence solution developed in Microsoft Power BI to analyze digital marketing campaign performance. The dashboard consolidates campaign metrics into meaningful KPIs and visual insights that support data-driven decision making.

## 2. Business Problem

Marketing teams often manage campaigns across multiple platforms, making it difficult to track campaign effectiveness, budget utilization, and lead generation from a single location. Manual reporting is time-consuming and delays business decisions.

## 3. Project Objectives

- Monitor campaign performance using KPIs.
- Analyze Spend, CPC, CPL, CTR and Conversion Rate.
- Track campaign trends over time.
- Compare campaign performance.
- Analyze geographical lead distribution.

## 4. Dataset

The dashboard uses marketing campaign data consisting of Date, Platform, Campaign, Spend, Clicks, Impressions, Leads, CPC, CPL, CTR, Conversion Rate and Location.

## 5. Data Preparation

Power Query was used for data cleaning, handling missing values, correcting data types and preparing the dataset for reporting.

## 6. Data Modeling

A relational data model was created to ensure accurate filtering, efficient calculations and scalable report performance.

## 7. DAX Measures

Implemented DAX measures for Total Spend, Leads, Clicks, Impressions, CPC, CPL, CTR and Conversion Rate.

## **8. Dashboard Features**

- KPI Cards
- Dynamic KPI Selector
- Campaign Analysis
- Trend Analysis
- Location-wise Lead Analysis
- Interactive Filters

## **9. Business Insights**

- Compare campaign performance across platforms.
- Monitor budget utilization.
- Identify top-performing locations.
- Evaluate campaign trends for optimization.

## **10. Tools & Technologies**

Microsoft Power BI, Power Query, DAX, Microsoft Excel, Data Visualization.

## **11. Key Learnings**

Strengthened skills in dashboard development, data transformation, DAX, data modeling, KPI reporting and business intelligence.

## **12. Conclusion**

The project demonstrates how interactive dashboards can transform marketing data into actionable insights for business stakeholders.
